COVID-19 Testing - Travel Advisories

Due to the global outbreak of COVID-19, the CDC has issued travel advisories to the affected countries listed below.

Avoid all non-essential travel to:

- China
- Iran
- South Korea
- Italy

Avoid cruise travel to and within Asia.

Practiced enhanced precautions when traveling to Japan. CDC recommends older adults and those with chronic health conditions consider postponing travel.

Public health officials encourage anyone who returns from a country with travel restrictions to self-quarantine for 14 days and report any concerning symptoms to health care provider or a health department in advance before presenting at a medical facility.

Updated travel advisories can be found at:
